M. SIVASHANMUGAM

Junior Software Engineer — .NET Full Stack Developer

8754187717 | sivamurugan032004@gmail.com | linkedin.com/in/sivashanmugam27032004 | github.com/sivashanmugam032004

PROFESSIONAL SUMMARY

Junior Software Engineer with hands-on production experience building and supporting full-stack applications across fintech, AI-powered analytics, and logistics/manufacturing domains. Skilled in designing complete database architectures, building secure REST APIs with C#, ASP.NET Core, and Entity Framework Core, and developing master-data-driven frontends in React and Razor/MVC. Experienced with JWT authentication, third-party API integrations (KYC, payments, digital signature, SMS), and Generative AI/LLM integration — independently built an AI-powered natural-language-to-SQL assistant using Google Gemini across a 267-table database. Also handle live production support, client training, and direct backend/data fixes on deployed systems.

TECHNICAL SKILLS

- Languages: C#, Python, OOP, Exception Handling, Debugging, Collections, LINQ, JSON
- Backend: ASP.NET Core Web API, ASP.NET MVC 5, ADO.NET, Entity Framework / Entity Framework Core, JWT Authentication, REST API Development, Stored Procedures, Role-Based Authentication
- Frontend: React.js, React Native, HTML5, CSS3, JavaScript, Bootstrap, AJAX, jQuery, Razor Views
- AI / GenAI: LLM Integration, Generative AI (GenAI), Prompt Engineering, Google Gemini API, Streamlit, Text-to-SQL
- Database: SQL Server, Database Design, LINQ Queries, Transaction Management
- Tools & Platforms: Visual Studio, VS Code, SSMS, Postman, Git, AWS, IIS, Netlify
- Integrations: Razorpay, Surepass (Aadhaar), Income Tax PAN API, eMudhra (Digital Signature), SMS Integra

EXPERIENCE

NBFC Banking Loan Application

Tech Stack: *React, React Native, C#, ASP.NET Core Web API, Entity Framework Core, JWT, LINQ, Stored Procedures, SQL Server*

- Owned full backend and database design for a loan application platform used across web and mobile clients, building all REST APIs in ASP.NET Core Web API (C#) with Entity Framework Core and LINQ, combined with stored procedures for complex queries and loan calculations.
- Implemented JWT-based authentication with role-based access control; created wireframes and built master-data-driven React frontend templates (no hardcoding), integrating backend APIs directly.
- Integrated third-party APIs: Surepass (Aadhaar verification), Income Tax Dept. API (PAN verification), eMudhra (digital signature), Razorpay (payments), and SMS Integra (SMS/OTP).
- Tested all APIs, including file uploads, via Postman; deployed frontend on Netlify, backend on IIS, and production infrastructure on AWS.

SANCO AI Assist — Logistics Import & Export Management System

Tech Stack: *Python, Streamlit, LLM, Generative AI, Google Gemini API, SQL Server*

- Independently designed and built an LLM-powered, Generative AI-based natural-language-to-SQL chat assistant for a logistics/CFS company, after analyzing table structures and relationships across a 267-table SQL Server database.
- Leveraged Google Gemini (LLM) with engineered prompt templates to convert natural-language business questions into validated SQL queries in real time, using a dynamic schema-context engine to feed the LLM only relevant schema per query.
- Added multi-turn conversational memory, file/voice input support, IP tracking, and secure credential management (environment variables, credential-masked logging).
- Integrated the Port Setu CFS Gate Detail API for container Gate IN/OUT movement data submission; built a custom Claude.ai-style chat UI on Streamlit.
- Handle and maintain the broader SANCO logistics system end-to-end, resolving client issues spanning backend logic, frontend UI, and database-level changes.

KVM — Manufacturing & Inventory Management System (Seafood Production)

Tech Stack: *ASP.NET MVC 5, C#, LINQ, Entity Framework, SQL Server, Razor View, AJAX, jQuery, JSON, HTML, CSS, JavaScript, API*

- Developed the Sales Order, Sales Invoice, and Sales Report modules within an existing production inventory management system for a seafood production company.
- Studied and understood the complete existing application flow and codebase to take over ongoing support responsibilities.
- Conducted hands-on client-site training and serve as the primary support point of contact — handling client-reported issues, backend code changes, and direct production data updates on the live server.

EDUCATION

Bachelor of Engineering — Computer Science

Paavai Engineering College | Graduated 2025 | CGPA: 8.16

CERTIFICATIONS

- DotNet Full Stack — Palle Technologies, Bangalore
